Wald chi2	20.454	95.300	11.855	57.829	13.817	58.556	17.572	50.779

Note: The dependent variable (TFP) is estimated according to Akerberg, Caves, Frazer (2015). Instruments for level equation are lagged differences. Heteroscedasticity-robust standard errors are in brackets. Controls include firm size, academic employees share, technological potential, price competition, foreign ownership and appropriability. The Arellano-Bond test for zero autocorrelation in first-differenced errors does not reject the null hypothesis of no serial correlation at order two. Hence, the moment conditions are valid. The Hansen test of overid restrictions confirms the validity of the instruments in each equation.
 * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$
